Art Unit: 2655

DETAILED ACTION

Double Patenting

Claims 1, 2, 30 and 32 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1, 5, 20, 33 and 35 of copending Application No. 10/006,619. This is a <u>provisional</u> double patenting rejection since the conflicting claims have not in fact been patented.

Claim 1 of the present application is being claimed in claim 1 and 33 of copending application 10/006,619. For example:

Claim 1 of Application 10/006,619 recites:

An optical disc assembly, comprising: a first layer containing optically readable structures which are trackable by an optical disc reader and which have encoded speed information enabling the optical disc reader to rotate the optical disc assembly at a speed that is determinable from said information; and at least one insert having a surface capable of receiving an analyte which can be detected by the optical disc reader.

Claim 1 of application 10/005,313 recites:

An optical disc assembly comprising: optically readable structures which are trackable by an optical disc reader and which have encoded speed information enabling the optical disc reader

Page 3

Application/Control Number: 10/005,313

Art Unit: 2655

to rotate the optical disc assembly at a speed that is determined from the speed information; and an analyte section capable of receiving an analyte which can be detected by the optical reader.

The dependent claims 2 of the present application claims the same invention as set forth in claim 5 of application 10/006,619. See the claims for comparison.

Further claim 30 of the present application corresponds to claims 20 of application 10/006,619. And claim 32 of the present application corresponds to claim 23 of application 10/006,619. See the claims for comparison of claimed limitations.

Allowable Subject Matter

Claims 3-29, 31 and 33-45 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 38 is allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record alone or in combination does not teach or suggest the optical disc assembly and method having the combination of elements and steps with their recited structure and process, along with the specific structure and process of the analyte section capable of receiving an analyte which can be detected by the optical disc reader as set forth in claims 3-29, 31 and 33-45, and as disclosed in the specification.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Virtanen (6,030,581) discloses an optical apparatus having an optical disk that includes analyte.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MUHAMMAD N EDUN whose telephone number is 703-308-1550. The examiner can normally be reached on FLEXITIME.

Art Unit: 2655

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, DORIS TO can be reached on 703-305-4827. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-4700.
